## Neighborhood Police Substation

## “Building closer relationships”

By having a police substation here, there will be an increased police presence on a regular basis in the building and around the neighborhood. “Presence is always good because if police officers are here it probably will deter crime.” We been sought out to put substations in many areas, but it’s just not possible.

*Stamford CT. Police Captain*

# “Presence is always good”

The Eagle NPS Neighborhood Police Substation is an affordable tool for tailoring Community Policing efforts with the citizens it serves.

The facility encourages neighborhood involvement by offering residents and businesses with a centrally located police presence.

The NPS facility is a proactive approach to resolve all public safety concerns that may arise. It reduces fear in the community through neighborhood presence and prevention of crime.

High definition wireless camera package can be located around the neighborhood. This would create a private wireless network that can also transmit video feed to the main Public Safety Building. Officers can monitor what's going on within a couple mile radius of the PMS facility.

“The neighbors do feel much safer, they have four officers who are dedicated to their neighborhood. They know the officers . They talk with them regularly. They have lots of good contact with them.”

St. Louis Police Department
